SUMMARY

I'm a junior web developer with a background in sales. I enjoy new challenges and feel passionate about learning new skills. I'm a problem solver who writes clean, robust code. Most of my development experience revolves around web technologies, including everything from designing, building, testing and deploying full-stack applications. I am a goal-driven team player who believes in open communication for efficient collaboration. I'm currently looking for a position as a full-stack developer.

TECHNICAL SKILLS

LANGUAGES: Python, JavaScript, Ruby

FRONT-END DEVELOPMENT: HTML5, CSS3, jQuery, Bootstrap, Ajax, API's

FRAMEWORK: Angular, Rails, Django, Express.js, Node.js, Flask

DATABASE: MySQL, SQLite, PostgreSQL, NoSQL, MongoDB

HOSTING: AWS EC2, Heroku

VERSION CONTROL: Git/Github

PROJECTS

Mayra + Mario – <http://www.mayraplusmario.com>

Wedding website containing important details about the special day. RSVP functionality-allowing guests to inform the couple about their presence. Guestbook sections where friends and family can leave the happy couple a message. Among others, gallery section showcasing the couple's pictures, wedding section with detailed information about the day, travel section for out of towners and a live countdown to the special day.

Technologies used: Ruby, Rails, PostgreSQL, HTML5, CSS3, JavaScript, Bootstrap, AWS EC2, Git, Github

Great Reads – https://github.com/dpm530/Python_Stack/tree/master/Fullstack_Django/belt_reviewer

Web application where users can review books as well as post book titles for other people to review them. Users will be required to register. Both login and registration have validation. Once a user is logged in they will be able to see other people's books as well as their own. Users will be able to delete only reviews created by them.

Technologies used: Python, Django, SQLite, HTML5, CSS3, JavaScript, Bootstrap, Git, Github

Share it – https://github.com/dpm530/MEAN_Stack/tree/master/MEAN/Message-Board

Message board site (reddit clone) where users can login, register and post messages. Each message posted is validated; the message list is updated dynamically as soon as a new message is posted.

Technologies used: MongoDB, Express.js, Node.js, Angular, JavaScript, HTML5, CSS3, Bootstrap, Git, Github
