- PostreSQL

HOSTING:

- AWS EC2

- Heroku

VERSION CONTROL:

- Git

- Github

I'm a junior software developer with a background in sales. I enjoy new challenges and feel passionate about learning new skills. I'm a problem solver who writes clean, robust code. Most of my development experience revolves around web technologies, including everything from designing, building, testing and deploying full-stack applications. I am a goal-driven team player who believes in open communication for efficient collaboration. I'm currently looking for a position as a software developer.

Projects

Group Up - https://guarded-anchorage-86188.herokuapp.com
This web application(Meetup clone) allows users to create an account with their information, create events of different categories that other people can attend as well as delete their own events. Users can also choose to RSVP to other events, each event has a discussion area where people attending can comment.
Technologies used: Ruby, Rails, PostgreSQL, HTML, CSS, JavaScript, Bootstrap, Git, Github, Heroku

Jelp - https://www.jelp.website
This web application(Yelp clone) allows users to create an account and then have the option to create their business page with useful information where other users can add a rating as well as a review. Businesses are categorized by the service they provide.
Technologies used: Python, Django, MySQL, HTML, CSS, JavaScript, Bootstrap, Git, Github, AWS

My Medical - https://www.mymedical.site
Web application used to store valuable personal or family health records. Once a user has created an account they can start creating records of doctor visits, list prescriptions, list next appointments as well as categorize the record by type of doctor.
Technologies used: Python, Django, MySQL, HTML, CSS, JavaScript, Bootstrap, Git, Github, AWS

Experience

2018 - present

Freelance Software Developer
Austin, TX
- Developed full-stack applications using multiple libraries and frameworks.
- Deployed completed web applications using AWS EC2.
